WHY XRSQUID ?

4

- XRSQUID differs from the rest of the Xcrowd because it has a passionate team working to develop a fully-fledged ecosystem application surrounding the token. We aim to not only have a financially appealing cryptocurrency asset for short-term traders, but a suitable long term asset for serious long term investors.
- XRSQUID belongs to the SQUID GAME community and will use its new team to elevate its status in the crypto space, where we intend to reach new, exciting and promising opportunities in markets worldwide. Check out our roadmap below, which we will be fulfilling over the remaining year of 2021/22.

ADVANCED ROADMAP

5

Phase 1: Initiatives

- **Social Media & Website:** We have created our website, our Telegram group and our Twitter account.
- **Token creation:** We have deployed our Token on the XRPL Network and executed an airdrop 40% of the total supply (40 Billion) to 40K Trustlines.
- **Launch on Sologenic DEX:** XRSQUID launched on Nov, 7th
- **Apply for CMC and CG:** On Nov, 8th we have applied a listing request for CMC and CG

Today Nov, 10th after 3 days of launch, we have already 1450 TG Members and 4500 Twitter followers, we are still on the building the community

- **Initial Exposure:** Once the community is identified and fortified, the dev team will begin the marketing push and mass-media exposure, promoting awareness about our wonderful project.
- **Core Team Building:** The team is rapidly expanding to accommodate for the immense demand that XRSQUID has generated. This includes opening our arms to more programmers, marketing specialists, graphic designers, and expanding our connections network.
- **Community Health:** It is imperative for our success that we allow time for the FUD (Fear, Uncertainty, and Doubt) and paper-handed investors to mitigate themselves, so those who came for a quick dollar will finally begin to leave out boredom or needless anxiety. This method is going to build the strongest, most steadfast user base of any cryptocurrency on Earth

ADVANCED ROADMAP PART 2

6

Phase 2 Initiatives and Beyond

→ **Fortifying Exposure:** The XRSQUID marketing and graphic design teams will steadily preparing for a massive marketing push, looking to expand the user base by huge margins.

→ **Partnerships:** We are looking forward to get listed on CoinMarketCap and CoinGecko, we will work day and night on more HUGE exchange deals (ex. Bittrue) that will bring XRSQUID accessibility to the masses.

Phase 3 Developing our social media gaming pwa (progressive web app)

→ **App Development:** While we are doing all this stuff, we are also working on our application. In Q3 2022 we are planning to start an alpha testversion of our app and after finishing our testphase in Q4 2022, we are planning to release the Beta version to public.

→ **Stratospheric!** These are merely the fringes of the beginning. There is so much more to come and we are so excited for you all to grow as we grow.

Social Media Gaming Progressive Web App

7

- We plan to build an app which combines social media behaviour like facebook and instagram with gaming. Our goal is, to connect the SQUID GAME Community all over the world in ONE PLACE.
- Every Player will have its own profile, with their own AboutMe tab, own Wall, a gift tab which shows their received gifts, their profile pic, pictures tab. Profiles can be edited with custom backgrounds, custom youtube video, custom colors.
- Each Player will start with a value and an ingame cash. Each player will be in auction. Players can place bids on each other and win other players as asset. The more bids placed on someone, the higher the value will increase.
- Every player will have a BID button on their profile and an auction timer, which shows the remaining time of the own auction.
- The ingame currency can ONLY be purchased with XRSQUIDS crypto currency XRS.
- Once players connect with their wallet, the player can pay with XRS to buy ingame currencies.
- Separately we will build an NFT Market, where players can buy NFTs with XRS and gift them to other players. There will be much more features, which we will update during development
